

2014 Montana Government IT Conference

Microsoft Hands-On Lab Montana Room

Wednesday December 10, 2014

10:15 -11:15 “What’s new and different in SharePoint between 2010 & 2013”

Brief Summary: SharePoint – find out some of the new features and key differences between 2010 and 2013. Learn about how new discovery and data loss prevention features work, how you can easily integrate document level encryption, what the differences are between a MySite and a OneDrive for Business Site and more.

Intended Audience: Power / End User

1:45 – 2:45 “What’s new and different in Lync between 2010 & 2013”

Brief Summary: Lync – find out some of the new features and key differences between 2010 and 2013. Learn about how integration with Exchange makes discovery easier than ever, how persistent chat replaces activity feeds, how tabbed view and gallery view can make collaboration more efficient, and more.

Intended Audience: Power / End User

3:00 – 4:00 “Administering Office Desktop 365 deployment & OneDrive for Business”

Brief Summary: Office 365 lets you install Office on up to 5 desktop / laptops (as well as 5 tablet devices, as well as 5 phone devices), all from an end-user focused self-service portal. This session will focus on how the administration and reporting tools work for this innovative deployment technique. Office 365 also includes a DropBox, Box, Cubby, gDrive type local sync-to-cloud storage feature – this session will focus on the administrative aspects of OneDrive for business, in particular how to discover documents for an employee no longer with the state.

Intended Audience: Administrators

Speaker Name: David Zarling & Steven Fiore

Name of Organization: Microsoft

Phone: 952.832.8082 (DZ) 425.722.6746 (SF)

Email: David.Zarling@microsoft.com Steven.Fiore@microsoft.com
